Subject: Schedule Notes for Fate and Transport Team

Valerie –

Can you pass this onto the LWG and agency fate and transport teams?

All - Below is a status report and reminders on items we all agreed to work on this month and early next month. There is one “to do” that was for Eric Blischke that I am not sure of the status on, so I will follow up with him. Thanks.

1. **Done** - Ray Walton will provide a file of the EFDC boxes to Carrie Smith on 11/30.
2. **Done** - Carrie Smith will provide a file of refined F&T boxes to Ray Walton by 12/7.
3. **Underway** - Ray Walton will provide first example EFDC model output tables by 12/21.
4. **Done initially, follow up underway** - Bruce Hope to provide five flow year type distribution to Ray Walton and Carl Stivers by 11/30.
5. **Done** - Carrie Smith provided the new FWM to Nancy Judd at yesterday's meeting.
6. **Outstanding** - Eric Blischke will contact Burt Shepard to resolve the FWM bioavailability factor issue and reply to Carl and Nancy with direction by 12/7.
7. **Underway** - Carrie and Carl will discuss and execute F&T model recodes between now and

12/21.

8. **Underway** - Nancy Judd will review the new FWM and verify she can replicate functioning and model data transfer per above agreements by 12/14.
9. **Future** - Carrie and Carl will complete example model run(s) using the one month EFDC output from 12/21 to 1/4. [After discussing holiday schedules, I suggest a more realistic deadline for this is 1/11 and this should not impact the overall schedule. Please let me know if anyone objects.]
10. **Underway (hope to have this very soon)** - Nancy Judd will provide updated parameter values being used for the Round 2 Report objectives to Bruce and EPA team as soon as possible. LWG will need to discuss internally appropriate schedule for providing this information and will provide a goal date ASAP.
11. **Future** - Carl will also work on a suggested outline for the modeling report through this period with goal distribution data on or around 1/11.

Carl
